News 2021

IFÖ ELECTRIC

"Our design contributes with soft shapes to the assortment, a quality which is not only a matter of visual aesthetics. What we mainly wanted to add was a sensory and tactile dimension, so that the advanced industrial production can be experienced by hand."

– Kauppi & Kauppi

## OHM

Ohm is a porcelain luminaire collection for all possible situations and living spaces - indoors as well as outdoors. Inspired by older times porcelain insulators, the design by Kauppi & Kauppi celebrates the material and the century long heritage of Scandinavia's only press porcelain producer. Since the launch in 2019, the Ohm collection has received global recognition and won several prestigious design awards, honoring its contemporary and yet classic expression.

The collection includes a pioneering splash safe pendant for bathrooms and gardens, traditional light fittings for walls, ceilings and facades - as well as a special range for sauna interiors. The collection also introduced the company's first range of table lamps, designed to be placed within an arm's reach, on tables or in windows - enabling a close and tactile connection to the quality of the porcelain.

The 2021 Ohm news introduces a large clear glass silhouette tailored for E27 light bulbs, spreading a welcoming light. A light fitting that follows the overall program with versions for installations on facades, walls, ceilings and tables (Ohm 140/170 and Ohm Table 140/190). The previously launched siblings with opal shades, for a gently diffuse light distribution, also receives a new E27 lamp holder option (Ohm 140/170 and Ohm Table 140/190).

Another technical update includes the indoor versions of the existing suspended lights with opal glass (Ohm Pendant 100/155 and 100/215). The pendants are now available with an optional LED module, when a more powerful light solution is needed. Lastly, the Ohm 140/115 for walls and ceilings receives a new GX53 light source option. All new additions are available in black or white glaze. Grey and brown glaze are available upon request.
