

AAGE VENT

Fresh air vent for natural ventilation

The Aage Vent fresh air inlet is designed for installations using natural ventilation or mechanical air extraction. The vent can be used with or without a filter. AAGE Vent is installed with an installation frame allowing easy filter exchange without tools. The vent has double hatches and the insulation prevents condensation of water on the surface. The vent can be installed in both dry and wet locations. The AAGE Vent product family is designed and manufactured in Finland.

- **Manufactured in Finland**
- **7 different adjustments**
- **Filter against dust, pollen and smell**
- **Change filters without tools**
